**Report on “Process of Registration (IPR)”  
by Mr. Avi Garg, Patent Attorney**

**Date: February 09, 2019**

Intellectual Property Right (IPR) plays an important role in the world of innovation. Hence needs an accurate procedure to be followed to secure the unique ideas and work of various individuals which would help in progress of human society. A correct examination is must to ensure its authenticity.

Mr. Avi Garg as a Patent Attorney explained a detailed process of Intellectual Property Rights (IPR). To file a patent application, its respective patent office should be contacted. The application is examined by the patent office for acceptance and if accepted it is published in the gazette of accepted application. Then all the objections and oppositions are responded satisfactorily then finally the sealing of patent is done. While filing a patent its complete

specification should be there and duplicates won't be considered. All the oppositions should be overcome satisfactorily.

In order to secure the innovation from duplication it is necessary to file a patent as explained by Mr. Avi Garg as it would help lessen the destruction of one's creation.
